ABOUT ME

I am a proactive person who easily learns new things and adapts to new working teams. Nowadays, I am a Bachelor's Degree student at 'Universidad Siglo 21', and I work as a Senior Back-end Software Engineer at Clarika Software, providing services to DAC Group.

JOAQUIN ALBERTO IJALBA

WORK EXPERIENCE

- **Clarika Software.**

March 2023 up to the present day.

Sr Software Developer.

Conducting technical interviews for prospective candidates and providing reviews and feedback to internal team members, contributing to the continuous improvement of technical skills within the company.

Currently, I am focused on developing AI-oriented applications, utilizing graph databases such as Neo4j and front-end development with React. In these projects, I leverage .NET, SQL Server, and multiple Azure tools like Functions, Blob Storage, and App Services. I also integrate OpenAI APIs and employ Prompt Engineering techniques to enhance results with advanced AI capabilities.

March 2022 – March 2023.

Ssr Software Developer.

Developing solutions for the CAD Group, using .NET, SQL Server, Azure tools such as Batch, WebJobs, and different Storages. Working at the Location Data management sector creating back-end applications for large companies.

- **Mercado Libre Argentina.**

January 2022 up to the present day.

Back End Software Engineer.

March 2021 – March 2023

Back End Software Analyst.

Developing Back-end microservices for the Finance & Billing area using technologies such as Java Spring and Kotlin, together with relational and not-relational databases. Working with continuous integration processes, automatized tests, and Cloud deployments, using Amazon Web Services and the Google Cloud Platform.

- **Musimundo.**

August 2018 – March 2021

Analyst Developer.

Developing C# .NET and Angular 8 technology systems for the Business Development department, including Marketing, Contact Center, and E-Commerce areas. Mainly focusing on the management of customers as a business entity. Maintaining Legacy Software and managing Informix database.

- **CONMEGA A.C.E.**

July 2017 – August 2018

Computer Technician.

Working at hardware and Software maintenance for Musimundo and Crédito Argentino, including more than 300 branch offices, servers, data centers, and private networks and systems.
